

Atari VCS™ Pre-Sale Opens May 30th on Indiegogo!
Featuring The Limited Atari VCS Collector's Edition
Special Retro-Inspired Wood Front and Certificate of Authenticity

Early Bird packages Start at \$199 for Atari VCS Onyx
Updated Classic Joystick and Modern Controller Also Available to Order

**Enjoy the Linux-powered Atari VCS to play, create or port your own
games and multimedia content.**

Many popular modern titles will be playable on Atari VCS.

**As an homage to our past, every Atari VCS includes
the Atari Vault of more than 100 classic games.**

Play all-time arcade and home entertainment favorites like *Asteroids®*,
Centipede®, *Breakout®*, *Missile Command®*, *Gravitar®* and *Yars' Revenge®*

A completely modern connected device, the new VCS was designed in California by Atari. The company is partnered with AMD, who provides the VCS custom processor with Radeon Graphics Technology. The Atari VCS platform will offer support for 4K resolution, HDR and 60FPS content, onboard and expandable storage options, dual-band Wi-Fi and Bluetooth 5.0, as well as USB 3.0 support. A complete list of Atari VCS product specs will be posted at the time of pre-sale.

Atari appreciates your support and intense curiosity about VCS games and content, hardware specifications, production timelines and other key information. We're confident that we are putting the right pieces in place for a successful product and launch!

When the Atari VCS Pre-Sale goes live, access it here:
